

Great step in Floor Plan Survey technology - OrthoGraph for Android has arrived

OrthoGraph has released its professional building survey application on Android platform as well.

BUDAPEST, HUNGARY, November 25, 2015 /EINPresswire.com/ -- What's more, during the whole week ending on "Black Friday" everyone can get all [OrthoGraph](#) products on reduced prices including the licenses of the new Android version.

OrthoGraph is known of its professional BIM floor plan application running on iPads for saving time while surveying the built environment. Thanks to its handy features, it has won several awards and has users from all around the globe from all segments of the AEC industry. This extensive usage created extensive requirements, so it was time to move on to the next level to answer for these requirements on Android platform too.

During the previous years, OrthoGraph received plenty of requests that they should create OrthoGraph Survey System for Android too to complement their already successful iPad version. In response to these feedbacks, the company has developed the application's Android version as well.

From today, everyone will be able to download OrthoGraph Cloud Client on Android platform too from [Google Play](#), furthermore the company provides a 3 days-trial opportunity to try all the benefits of the application. During this trial period the users are entitled to get an online demo or a training for free of charge.

This new Android version is going to be the one and common version running on all mobile platforms, therefore OrthoGraph did the development from scratch and used all our experiences that they learned from their users during the last years.

The result is a new, "easy to understand" software with the professional features what users can expect from OrthoGraph.

All details about the Android version can be found on the following link:
<https://www.orthograph.net/android/>

Experience building survey from a unique, new aspect by the professional BIM CAD app.
