

# Discover What's Driving the \$22 Billion Software-Defined Data Center Market

---

*SDI Summit offers latest info about software-defined storage, software-defined data center, orchestration, and other key items of this emerging multi-\$G market*

SANTA CLARA, CA, USA, December 1, 2015 /EINPresswire.com/ -- The Software-Defined Infrastructure (SDI) Summit will present the latest trends in the current \$22 Billion Software Defined Data Center Market. Based on the latest information from Markets and Markets, the current \$22 billion market will grow at nearly a 30% CAGR to reach \$77 billion market by 2020. Industry leaders from Microsoft, IBM, VMware, Red Hat, Intel, Cisco, Nano Global, and Nexenta will deliver keynote describing their growth solutions.

Topics will include:

- SDI Helps Data Centers Maximize Performance for Varied Workloads
- Hot Edge, Cold Core, and the Rise of the Hyperconverged Infrastructure
- The New Open Distributed Application Platform
- Don't Know Much about SDI? Practical Pathfinding to Make It Happen in Your Data Center
- Policy Abstraction Helps SDI Drive Infrastructure Agility

Other key sessions will be pre-conference seminars on OpenStack, Ceph, and software-defined storage, as well as plenaries on software-defined data centers, SDI in 2025, user implementations, SDI futures, and top ten things you need to know about SDI today. Attendees will also hear from major end users such as GoDaddy, Verizon, and Intuit. A market research session and a VC Forum will make SDI Summit the event for everyone involved in any aspect of data centers.

SDI Summit is a three-day event including all-day seminars, free plenary sessions and keynotes, and breakout sessions on a wide range of important topics. A beer, pizza, and chat with the experts event will give attendees an opportunity to ask questions of leading specialists in small, informal groups.

## Event Details

What: SDI Summit 1st Annual Conference  
Where: Santa Clara Convention Center, Santa Clara, CA  
When: December 1-3, 2015

## About the Software Defined Infrastructure Summit

The SDI Summit is a three-day event focusing on SDI software and hardware technologies to improve IT flexibility and business agility of the organizations that deploy it. SDI Summit will feature an exhibition show floor showcasing the latest in SDI solutions.
