

# FrontGate Media Awarded Contract for Controversial Documentary The Principle

*FrontGate Media has been selected as the official agency for representation to launch the DVD and Blu-Ray release of the documentary The Principle.*

ORANGE COUNTY, CA, USA, December 3, 2015 /EINPresswire.com/ -- FrontGate Media has been selected by Stellar Motion Pictures LLC as the official agency for representation to launch the DVD and Blu-Ray release of their documentary [The Principle](#), written and produced by Rick DeLano, directed by Katheryne "KTEE" Thomas of In Ohm Entertainment, and executive produced by Robert Sungenis.

The award-winning firm will create and execute the PR Campaign, provide Social Marketing coaching, and create the Advertising Placement campaign to reach families, educators, home schoolers and the science community.

According to writer and producer Rick DeLano, "We chose FrontGate because of their highly experienced and coordinated team across PR, Social and Advertising. With their strong history of working on films, and documentaries in particular, we are excited to have their mind-share."

"The Principle has revealed surprising results from recent large-scale surveys of our universe. These surveys uncover evidence of the significance of Earth in the cosmos, and question the centuries old belief that the Earth does not have a central position in the universe." states Scott A. Shuford, Founder & Chief Engagement Officer of FrontGate. "I'm fascinated by the discoveries the filmmakers uncovered, and their questions that have led to such an abrasive response from the science establishment."

While the film received resistance from the science community, The Principle garnered much attention and support in its limited theatrical engagement, including multi-week runs in Chicago, Los Angeles and San Diego.

The Principle features narration by Kate Mulgrew (Star Trek Voyager, Orange Is The New Black and Ryan's Hope), visual animations by [BUF](#) (Game of Thrones, Life of Pi, Thor, Harry Potter, Avatar), and commentary from prominent scientists including George Ellis, Michio Kaku, Julian Barbour, Lawrence Krauss, and Max Tegmark.

## About The Principle

The Principle explores the significance of the Earth's place within the Cosmos. Tracing the

development of cosmology from its inception (Stonehenge, the Great Pyramid at Giza), through the great revolution of Copernicus, to the astonishing new discoveries of Earth-oriented alignments in the largest structures of our observable universe, The Principle leads us face-to-face with the question, and the challenge - are we significant within the structure of the Universe, and, if so, why and finally, what does this mean for the future of mankind? The film will be available to stream, and on DVD and Blu-ray beginning December 8, 2015. For more information, visit <http://www.ThePrincipleMovie.com>.
