

Build Your Own Cloud Using SageNext Tax And Accounting Application Hosting Service

SageNext is a leading hosting provider for tax and accounting applications, helping you build a highly customizable cloud platform.

AUGUSTA, GA, USA, December 8, 2015 /EINPresswire.com/ -- SageNext, a leading hosting provider for tax and accounting applications makes it easy to build a solid cloud based platform that shares applications as well as associated data across required users. Using hosted tax and accounting cloud, an entire department or office can be made online, promoting real time synchronization between multiple applications and users. Easily configured with a remote access, it's simple to get the service up and running in in a few hours with no additional hardware or software requirements. It doesn't even require an IT professional to supervise all the time.

SageNext makes best efforts to get the cloud setup available 24 hours so that the business doesn't suffer from critical downtimes. Application data, business data and personal data is always ready to get integrated with any available application to the cloud.

Navigation to the data is always easy as local desktops and is always ready to get shaped as per user's convenience. The company is always ready with a new architectural option for building the perfect platform that gives unified user experience.

Using SageNext means leveraging dozens of cloud experts to the requirements. The assessment team works closely with client's to ensure that the platform is ready with only required resources. 24X7 available support department always helps users to fix the issues immediately without causing any further problems. Users don't even run to the application support vendors.

The pricing is decided via the number of users and it is highly scalable, going up and down as per current requirements. Platform is suitable for any version and edition of any tax and accounting applications. No hidden charges other than just monthly hosting fees.

Datacenter inside US gives additional confidence to the Sagenext hosting services. The company currently hosts tax and accounting applications for more than 500 CPAs, accounting, and tax firms across USA.

[About SageNext:](#)

SageNext is a leading application hosting provider having specialization in tax and [accounting application hosting](#). The company has more than 5 years of hosting experience for the leading applications like: QuickBooks, Sage 50 or PeachTree, Drake, ATX, Lacerte, Proseries, Taxwise and Ultratax. We support all add-ons and other supportive applications on the same hosted platform. We host all versions and editions of above mentioned applications.

At SageNext, we practice with industry standard resources to give the most reliable and trustworthy hosted platform. We use SAS 70 II and SSAE-16 certified data centers located in New York and Dallas to host your application and data so that it always remains safe and secure.

We have more than 500 [QuickBooks hosting](#) clients along with other tax and accounting application

hosting users. We always put our best efforts to innovate new technologies to get maximum out of the technical resources for our tax and accounting professionals.

Our major advantages:
