Haypi Kingdom: The Return of the King 1.1.5 is an awesome game, which brings the players to a magic land of glory. Now, the new version is better than ever. It is so much smoother when it comes to gameplay optimization. There are more improvements in connection to the player interaction, too. Now the multiplayer experience is even more fun, with the brand new building War Hall, which has been introduced to the game. The War Hall is used to assemble allies' troops into a strong army to wage war. The capacity of the troops increases after building upgrade. After a

player locates a target, he or she can choose Assemble, and set the assemble duration. Then ally players will see that request in the War Halls in their cities. So the allies can send troops to the first player's War Hall. When the time for Assembling is up, all the troops march in attack. So War Hall has the important role to gather allies' troops and allow the Alliance to wage a war together. This sounds like features of a real warfare kingdom, doesn't it? The new building and the optimizations in the new version make the gameplay much more fun.

Haypi Kingdom: The Return of the King Patch 1.1.5 is really fascinating. Now this exciting and challenging game is available for free download from iTunes. Everyone can have gamer fun, without having to spend a dime. Haypi is proud and happy to be a productive developer.
