

# Revealing the Top VoIP Phone Company and Its Communications Solutions, Courtesy of TieTechnology

*Learn why this top VoIP phone company is beating out its competition with its variety of advanced technological tools and high-quality communications features.*

TAMPA, FLORIDA, UNITED STATES, January 23, 2016 /EINPresswire.com/ -- Businesses are now benefiting greatly to new communications solutions, thanks to the team at Tie Technology, a leading name in commercial commerce solutions. Offering the best, most advanced, and lowest cost small business hosted phone service, companies of all sizes and in many industries are discovering the numerous benefits of VoIP.

Hosted and powered through cloud computing, Voice over Internet Protocol, or, VoIP, substantially beats out traditional landline telephone systems. It's not dependent on decades-old technology and also does not require awkward, bulky hardware to manage and use. Companies are switching to VoIP because of its high-quality communications and for the following benefits:

Work Remotely from Practically any Location

These [top hosted phone systems](#) allow company team members and managers to work off site. This ability greatly improves collaborations, order submission, and fulfillment, increases productivity, and, betters customer experience. Employees can access and manage the network on the road, from practically any location on almost every device, wherever an internet connection is available.

Save Money Month after Month

costs to VoIP. There's no question that is decidedly more expensive. With VoIP, international and long distance calling is just a fractional of the cost of traditional landline service. What's more, acquisition costs of VoIP are significantly smaller than traditional telephony systems. Such money saving benefits give businesses the ability to save month after month, improving cash flow and lowering operating costs.

### Setup, Manage, and Relocate with Ease

VoIP requires no technical skill to setup, manage, or maintain. All maintenance is done off-site, automatically, and there's a simple interface to manage communications data. Unlike traditional landline systems, which require large and cumbersome equipment, VoIP is easy to relocate, and users experience a lot less downtime when moving.

### Access All Communications Data from One Platform

With VoIP, companies can access and manage all communication form from one channel. Access and manage texts, instant messages, faxes, email, voicemail, and chat sessions from one easy to use platform. Also, many features are available, including call waiting, call routing, call forwarding, and, video and voice conferencing.
