

Introducing the Best Hosted VoIP Provider Plans Available to Businesses, with Low-Cost, High-Quality Service Features

Businesses across the country searching for the best hosted VoIP provider plans are finding TieTechnology delivering exceptional services at a low cost.

TAMPA, FLORIDA, UNITED STATES, January 26, 2016 /EINPresswire.com/ -- There's a new challenge to [Cisco IP phones](#) in the Voice over Internet Protocol business technology sector, thanks to new offerings of exceptional communications services provided by Tie Technology. Superior voice and data reception and transmission are the centerpieces of these systems that specifically are designed with the end user in mind. The systems are intuitive and incorporate some feature options.

Voice over Internet Protocol technology certainly isn't new to the communications or business sectors. However, improved infrastructure and faster connections now make it possible for companies to take advantage of the very [best hosted VoIP solutions](#). The benefits of this technology are numerous and provide businesses with greater opportunity through communications:

*Communications cost control. Traditional telephony systems, which relies heavily on outdated, cumbersome technology decades and decades old, is very expensive. While consumer and commercial rates have dropped slightly, need to pass along maintenance and repair infrastructure costs remain a reality. VoIP utilizes internet communication, which is far superior and more reliable. Also, it costs a fraction of traditional land lines.

*Adaptable to change. When a business expands its presence into new localities, it must stay in

The image features the TieTechnology logo at the top, consisting of a stylized 'TT' in red and grey, with the company name 'TieTechnology' in red below it. Underneath the logo is the text 'Hosted Phone Services Provider'. Below this is a circular diagram with three icons: a grey telephone handset, a grey speech bubble with three horizontal lines, and a blue computer monitor displaying a white telephone handset icon. Arrows connect the icons in a clockwise cycle. At the bottom of the diagram is the text 'Business Phone and Internet Service'.

communication with its home office. Also, it must be able to provide the free ability for employee communication and collaboration, and, customer service. [VoIP business phone service](#) makes it easy to adapt to changes without technological skill or large, bulky equipment.

*More free feature options. Traditional telephone companies make a profit by charging for every added service a business uses. While these are inexpensive line items, totaled together, adds up to a lot of money. VoIP gives businesses the ability to add or remove phone and communication feature services at no cost. Such features include voicemail, video and voice conferencing, voicemail and fax via email, and more.

*Companies also enjoy tracking capabilities for expenses. VoIP users can access all user history and make changes as necessary. Voice over Internet Protocol is superior in all aspects of business communications. These systems are more reliable, provide better quality, and offer more flexibility than traditional telephony at a lower cost.
