Top Ranking VoIP Business Phone Service Rates that are Affordable for Both Small and Large Businesses, Care of TieTechnology VoIP Business Phone Services

*Deborah Salmon*

Internet Protocol, or, VoIP delivers a robust suite of features for a decidedly lower cost than traditional landline services. Companies are switching to this advanced communications technology because it offers a host of benefits, which include, but are not limited to the following;

Low Acquisition, Maintenance, and Usage Costs

Businesses enjoy a low acquisition costs to implement VoIP systems and connect multiple devices. In fact, when companies compare [hosted VoIP business service plans](#) to

traditional landline service, there's no question it's less expensive. Businesses relying on landline telephony must spend a substantial amount of capital on equipment maintenance. Conversely, VoIP is cloud based and maintenance is worry free, done automatically off site. In addition, international and long distance calls are significantly less expensive with VoIP.

## Ease of Use and to Relocate when Necessary

Companies using VoIP enjoy an easy to use communications interface which supports nearly any device, including traditional telephones. Traditional landline service is dependent on aging infrastructure, which is expensive to maintain and repair. Landline systems are equipment heavy, requiring a lot time and technical knowledge to relocate. VoIP relocation is simple and can be moved from one location to another without technical skill. It also has the distinct advantage of less down time during moves.

## Advanced Communication Features and Management

Businesses are able to access and use several powerful features with VoIP. These include call forwarding, call routing, call waiting, voice conferencing, voicemail, fax to email, voicemail to email, video conferencing, and manage numbers and extensions from one interface.

#### Ability to Work Remotely for Improved Productivity and Collaboration

Companies greatly benefit from VoIP because these systems improve productivity through more flexible collaboration. Team members and managers can work remotely and communicate from practically any device that connects to the internet.
