Mark Systems Market Leader in Multiple Categories in Residential Construction Software Survey

According to the survey of Constructech readers, Mark Systems software topped multiple categories for residential construction.

MOUNT HOLLY, NEW JERSEY, UNITED STATES, December 16, 2015 /EINPresswire.com/ -- Constructech just released their 2015 IT Playbook: the definitive reference guide for IT adoption and forecasting in the construction industry.

According to the survey of Constructech readers, Mark Systems software topped multiple categories for residential construction including Estimating, Project Management, CRM, and Mobile Software.

> Our rapidly expanding engineering team is devoted to developing and enhancing IHMS at a steady pace. In 2015 alone, we released over 600 system enhancements; an average 5% increase year over year.
> *Scott Duman, President & CEO of Mark Systems*

"The construction industry has changed drastically during the past few years, as technology continues to evolve and play a critical role in every aspect from the office, to the jobsite, and to everyone involved in the construction process," says Peggy Smedley, editorial director, Constructech magazine. "That's why our 2015 Constructech IT Playbook is so important to the construction community this year. It is about IT spends and trends and analyzing the data for homebuilders and constructions professionals alike," she adds.

Based on the results of the survey, it is clear why Mark Systems' IHMS is quickly becoming the first choice for mid-sized and large volume home builders when it comes to overall functionality, service, and technical support.

"Mark Systems is experiencing significant growth, with new customer sales increasing over 100% in 2015," said Scott Duman, President & CEO of Mark Systems. He continues, "Our rapidly expanding engineering team is devoted to developing and enhancing IHMS at a steady pace. In 2015 alone, we released over 600 system enhancements; an average 5% increase year over year."

About Mark Systems

Mark Systems' IHMS is the industry's only single-database, enterprise wide home builder software suite.

The premier residential construction software on the market today, IHMS combines a proven track record of performance with cutting edge technology to provide the financial control today's tough business climate demands.

Mark Systems' single-database architecture means that residential construction information is delivered instantly and transparently to every team member. Purchasing, scheduling, field operations, trade partners, sales office, and design center personnel all effortlessly share critical information.
