

# Pumpic Now Available on Google Play With Control Panel App for Monitoring Solution

*Pumpic has introduced a separate application for the Control Panel of its monitoring app. The new app is already available on Google Play free of charge.*

OVERLAND PARK, KANSAS, UNITED STATES, December 24, 2015

/EINPresswire.com/ -- Most parents use smartphones these days. Mobile devices make people's lives easier and help them to perform multiple functions like paying bills, buying baseball tickets or car insurance at the tips of their fingers.

Pumpic also continues to improve its monitoring solution to be even more convenient for parents in addition to increasing reliability and multifunctionality. Thus, its developers have recently launched an additional application for the Control Panel of its monitoring app. Pumpic Control Panel Mobile App allows parents to monitor kids on the go using an Android smartphone.

“

The launch of the Control Panel App is an important part of Pumpic's roadmap.  
*Alex Stevenson, PR Manager*

Unlike [Pumpic Mobile Monitoring](#), the Control Panel App does not collect any information directly from the target device. It allows viewing of monitored activities and can control some of them. Parents can enter the Control Panel by either logging in on at [cp.pumpic.com](http://cp.pumpic.com) or via the Pumpic Control Panel Mobile App installed on their smartphones.

The difference between the app and the full version of the Control Panel is the number of features provided. Pumpic Control Panel Mobile App for Android is currently limited to selected features:

- Call logs
- Text messages
- Location
- Browser history
- Contacts
- Remote device reboot
- Remote app reboot
- Remote device lock

“The launch of the Control Panel App is an important part of our roadmap. Even though our web version is very mobile friendly, the dedicated app is much more comfortable to use. Currently, there are only eight selected features provided and no tablet compatibility included, but our team continues to improve the functionality of the Control Panel App for Android. The iOS version is under

development as well,” says Alex Stevenson, Pumpic’s spokesman.

Pumpic Control Panel Mobile App is fully compatible with Android smartphones (version 4.0 and up). It is [available on Google Play](#) free of charge. Operation of the Control Panel app requires an activated subscription assigned to the target device, which can be either Android or iOS enabled.

#### About Pumpic

Pumpic is a group of enthusiastic IT specialists formed in 2012.
