

# Introducing the Best Hosted VoIP Provider Plans that Offer a Robust Suite of Communications Features at a Very Low Cost

*Find the best-hosted VoIP provider plans that give companies the power to take their communications to a whole new level at a low cost, without risking ROI.*

TAMPA, FLORIDA, UNITED STATES,  
February 25, 2016 /EINPresswire.com/ --  
Companies can now integrate old [Cisco IP phones](#) with the latest in voip technology,

thanks to the business solution provider, TieTechnology, a leading name in communications. VoIP or voice over internet protocol uses modern and advanced technology to improve business communications while reducing costs simultaneously. Companies of all sizes and across many different industries are turning to VoIP as a real solution for communications facilitations and management because it's easy to setup and configure, offers excellent customer support, comes at an inexpensive cost and improves communications.

“

TieTechnology is a leader in business service based solutions

Easy to setup and configure

The [best hosted voip solutions](#) are easy to setup and manage, requiring no technical expertise to configure.

Businesses switch to VoIP because it offers so many useful

features and does not require an experienced technician to setup. Traditional PBX landline equipment is expensive to purchase, set up and maintain because of the bulky hardware used to support outdated technology that's nearly 140 years old.

Exceptional customer support

Companies with [voip business phone service](#) gain quality customer support when needed, through a variety of exchanges. Phone and internet support make troubleshooting a cinch and take less time. Also, businesses can manage many features in-house.

Low cost long distance and international calling

Voip long distance and international calling rates are a fraction of traditional landline costs. Call quality is good, and there is little latency with VoIP, compared to traditional PBX lines.

Companies can quickly create and delete extensions on-demand

What's more, businesses can also manage all communications through one portal. These include text, instant message, chat, email, voicemail, and more, which can all be accessed and controlled through one single interface. This capability improves response time, enhancing customer experience and facilitating more collaboration between team members.

Simple to move when needed

Moving into a new business space is difficult because it requires so much technical support. Landline equipment is bulky and awkward, difficult to move and setup, requiring a skilled technician.

Downtimes are long and costly with traditional PBX lines, but, voip is easy to relocate from one place to another and is done quickly and efficiently, with significantly reduced downtime.

Companies are making the switch to voip from traditional landline service because it offers exceptional voice quality, easy management, and better communications solutions. With very low rates and such useful features and controls, voip is the best option for the future to grow businesses.
