

Inexpensive VoIP Business Phone Service Rates are Giving Companies the Power to Do More, Courtesy of TieTechnology

Learn how to get the lowest priced voip business phone service rates and establish a local presence with communications solutions made to improve sales.

TAMPA, FLORIDA, UNITED STATES, February 27, 2016 /EINPresswire.com/ --

The [best VoIP phone service](#) in the communications industry is here, thanks to

business solutions leader, TieTechnology. Voice over Internet phone service replaces traditional PBX landlines with low cost calling rates and more advanced features. It integrates with practically any existing equipment and supports technologies such as fax. Businesses are cutting costs and increasing communications capabilities by turning to Voice Internet Protocol (VoIP) technology. The technology does far more than traditional phone service and has distinct advantages.

“

TieTechnology VoIP Business Phone Services provides the highest quality telecommunications and engineering consulting services within the telecommunications industry at the most competitive rates
Connie Wright

Low cost. VoIP offers [cheap business phone service](#), often at a fraction of the cost of PBX or private branch exchange. Instead of relying on bulky wires and outdated technology invented in 1876, VoIP incorporates cloud-based enterprise solutions that offer many features not available through landline.

Versatile features. TieTechnology's [voip business phone plans](#) offer such features as call parking, call waiting, call monitoring, call recording, voice and video conferencing, call

blocking, and much more. With voip, businesses can integrate and manage all communications from one interface, including text, chat, instant message, email, and voicemail. Email to voicemail and-and voicemail transcription is ideal tools to increase productivity and save time.

Call monitoring

This feature gives businesses the power to listen into conversations between employees and customers. A valuable training tool to improve customer service experience and to close more sales. Also, call recording allows the review to refine customer service protocols.

Exceptional quality

VoIP call quality is great with little latency. Instead of transmitting electric current, voice over the internet works quickly, much like the worldwide web, sending batch data packets at high speed.

Affordable long distance and international calling

Because voip works in the cloud, over the internet, long distance and international calling rates are substantially lower than a traditional landline. Companies are utilizing this ability and now can facilitate and grow new business relationships abroad, providing even more, opportunity.

Get local numbers

Market expansions lines provide businesses with the option to create new, local numbers in different municipalities, establishing a local presence. Customers call local area codes and are seamlessly connected. Calls also can be routed to any destination choice, and businesses have the power to create and delete extensions as needed.

VoIP offers quality communications solutions for any size business and is more affordable than landline service. It's flexible and requires no technical knowledge to setup and manage. VoIP is also easily relocated from one office to another and can be configured in short time.
