

Proton Therapy Sales Orders Reached Just Over US\$ 1 Billion in 2015

Proton Therapy sales orders have more than doubled in 2015 compared to 2014

LOUVAIN-LA-NEUVE AND LALAYE, BELGIUM AND FRANCE, January 6, 2016 /EINPresswire.com/ -- MEDDraysintell noticed that in 2015 the global [proton therapy](#) sales orders grew to record levels at just over US\$ 1 billion for a total of 58 proton therapy treatment

rooms, more than twice as much as in 2014. Two companies commanded together almost half of these orders.

There is an increasing interest for one-room compact proton therapy centers which accounted for about 35% of the global orders.

By end of 2015, 174 [particle therapy](#) treatment rooms were operational worldwide, and projections by 2030 anticipate the proton therapy world market to reach between 1,200 and 1,800 treatment rooms worldwide.

There is a growing clinical evidence regarding the efficacy of particle therapy that will progressively be used to treat a broader number of indications. Therefore, there is now a clear positive stance on the future of the proton therapy market, and this technology is becoming a real part of the global [radiotherapy](#) world.

A complete analysis of the Global Proton Therapy market is provided in the third edition of the renowned World Proton Therapy market report which features in a 250-page document a comprehensive review of the market dynamics on a world basis. This report analyzes both past and future trends up to the year 2030, and contains a detailed profile of 20 promoters, manufacturers or developers of proton and carbon therapy equipment.
