

Wulian Enjoyed a Fruitful Journey in CES2016

LAS VEGAS, NEVADA, UNITED STATES, January 13, 2016 /EINPresswire.com/ -- As the most influential gathering place for consumer technologies worldwide, the [CES2016](#) (Consumer Electronics Show®) has been held in Las Vegas, NV on January 6-9, 2016, with more than 3,600 exhibiting companies from around the world unveiling their latest consumer technology products and services. [Wulian](#) Co., Ltd. (Wulian), as the board member of ZigBee Alliance and one of the leading providers of IoT infrastructure and solutions, debuted its newest products on the 2016 CES stage and aroused wide public attention.

As a leading IoT enterprise, Wulian has devoted to the research and development of ZigBee technology since its foundation, and all the Wulian products and solutions have been successfully applied to a multiple of sub-fields in IoT; such as Energy-efficient Lighting, Security Supervision, Home Appliances Management, Environmental Detection, etc. With an increasing number of global programs in countries and areas like North America, Australia, South America, Russia, the Middle East, and Southeast Asia, Wulian has undoubtedly become a vital important supporting power for the construction of intelligent cities worldwide. Meanwhile, Wulian also plays an active role in the research and promotion based on the open standards of ZigBee technology.

In CES2016, Wulian was concentrating on displaying the [Smart Home](#) system based on ZigBee Agreement. As a supervising system for Smart life, it is built on IoT, Cloud computing and big data technology and creates a perfect cooperation between hardware devices and software application platforms, aiming to enhance the security and health of modern family. With the mobile terminal of smart phones or tablets, users can realize security supervision, environment detection, health management and some other entertaining effects through the functions of Remote Control, Time Setting, Group Linkage and Scene Management.

In the CES2016, when interviewed by TechCrunch, the American-based leading technology media, Wulian exhibiting representative introduced Wulian Lighting System, Smart Door Handles, Wireless Monitoring Cameras and also the new products to TechCrunch and shared the features and merits of the products with them. For example, in CES2016 the “Dream Flower” Smart Vase, with its first debut, could be viewed as the new star among Wulian products and captured wide attention among the visitors. With its stylish, elegant design and multi-functional features, the “Dream Flower” Smart Vase was working as a comprehensive environment detector, and it could provide a stable signal when connected to dual-band WiFi and could display the levels of PM 2.5, CO2, VOC gases and noise by intelligent interaction. What’s more, it also supported voice broadcasting and boasted 16 million colors lighting.

As one of the major technology trends in recent years, the Internet of Things, connects a bewildering array of products, from cars and containers to devices in the home. The CES2016 revealed and delivered the information that smart home technology would no longer be a priority for the tech savvy or the young and affluent; whereas, it would enter the mainstream of family life in the foreseeable future. Wulian, bearing the mission of creating a low-power consumption smart world for families, makes unremitting endeavors in the research and development of IoT sensors, controllers, mobile IoT, cloud computing and big data to bring professional devices and solutions to smart homes.
