

# Nevis' thrust to geothermal energy

*Small Caribbean Island to Lead the World in Green Energy*

CHARLESTOWN, NEVIS, January 15, 2016 /EINPresswire.com/ -- CHARLESTOWN, Nevis - On the heels of the Paris Climate Change Conference when all the countries of the world are focused on reducing their carbon footprints, the Caribbean island of Nevis is actually taking steps to do just that. This is the key message that the Honorable Mark Brantley, Deputy Premier and Minister of Tourism for Nevis conveyed to Americans as he appeared on major US print and broadcast media during his recent visit to New York.

Nevis is poised to be “the greenest place on Earth” when its geothermal program comes online in 2017. The island is blessed with a vast resource of geothermal energy, enough that it can be 100% off fossil fuels and has energy left over to share with neighboring Caribbean islands. No other country can currently make this claim.

“

We are incredibly proud of the project we’ve undertaken and happy to share this news with the US and the world.

*Hon. Mark Brantley, Deputy Premier & Nevis Tourism Minister*

Minister Brantley was joined by Bruce Cutright, CEO of Thermal Energy Partners and Principal at Nevis Renewable Energy Inc. (NREI) whose company works in Nevis on the production of geothermal energy.

“We are incredibly proud of the project we’ve undertaken and happy to share this news with the US and the world. Geothermal energy will be transformative for Nevis, bringing it to 100 percent power generation from clean, less costly renewable energy sources,” Brantley explains. “Looking

ahead, we plan to export our expandable energy to neighboring islands becoming the Norway of the Caribbean.”

## About Nevis

Nevis is part of the Federation of St. Kitts & Nevis and is located in the Leeward Islands of the West Indies. Conical in shape with a volcanic peak at its center known as Nevis Peak, the island is the birthplace of the founding father of the United States, Alexander Hamilton. The weather is ideal with temperatures year-round in the low to mid-80s°F / mid 20-30s°C, cool breezes and low chances of precipitation. Air transportation is easily available with connections from Puerto Rico, St. Kitts and St. Maarten. For more information about Nevis, travel packages and accommodations, please contact the

Nevis Tourism Authority, USA Tel 1.407.287.5204, Canada 1.403.770.6697 or our website <http://www.nevisisland.com> and on Facebook – Nevis Naturally.
