

Optimize Stirred Tank Mixing Performance with MixIT 3.6 Release – now featuring Simulation Queue.

SAN ANTONIO, TX, UNITED STATES, January 19, 2016 /EINPresswire.com/ -- Optimize [Stirred Tank Mixing Performance](#) with MixIT 3.6 Release – now featuring Simulation Queue.

MixIT launcher - Tridiagonal Solutions Inc, is pleased to announce the release of MixIT 3.6, the enterprise software that predicts stirred tank performance, with a unique capability of automated [3D CFD analysis](#).

MixIT 3.6 enables users to queue up their CFD simulations with options to control parameters for each simulation. Simulations can be paused and restarted with ease.

MixIT 3.6 introduces a more user friendly GUI for the central database connection.

MixIT 3.6 automated report generation feature now includes reports for volume averaged vessel velocity, turbulence kinetic energy (k), turbulence dissipation rate and micro-mixing time.

About MixIT.

MixIT is the next generation collaborative [mixing analysis and scale-up tool](#) designed to facilitate comprehensive stirred tank analysis using lab and plant data, empirical correlations and advanced 3D CFD models. It combines knowledge management tools and mixing science in a unified environment deployable enterprise wide. About Tridiagonal Solutions Inc.

Tridiagonal Solutions Inc is an advanced engineering solutions provider with expertise in process performance enhancement and product development solutions for industrial clients worldwide. Their portfolio includes process engineering, CFD, EFD, Discrete Element Modeling services and chemical mixing simulation products. Tridiagonal Solutions caters to the Chemical and Process, Oil and Gas, Consumer goods, Food, Electronics, Power Generation and Healthcare Industries.
