

Herpes: The Virus Could Be the Cause of Vaginal Pain During Sex; The CBCD Reviews a Report

"Some vaginal infections can make sex less than comfy." (1)

ROCHESTER, NEW YORK, UNITED STATES OF AMERICA, January 21, 2016 /EINPresswire.com/ --

"Infected with the herpes virus (HSV-1 or HSV-2)? We recommend taking [Gene-Eden-VIR](#) or [Novirin](#)." – Greg Bennett, CBCD

A major cause of pain in the vagina during sexual intercourse is an infection with the herpes virus. "Infections of the vagina and the area around it cause inflammation of the tissues and so commonly cause pain on having sex. Infection may be with ... viruses such as herpes." (2) The medical term used for pain felt in the pelvis and vagina during or after sexual intercourse due to an infection with herpes or another disease causing organism (as well as other causes) is called "Dyspareunia."

The Center for the Biology of Chronic Disease (CBCD) recommends that women infected with the latent herpes virus (HSV-1 or HSV-2), take Gene-Eden-VIR or Novirin. The formula of these natural antiviral supplements was designed to help the immune system target the latent HSV.

The formula of Novirin and Gene-Eden-VIR was tested by Hanan Polansky and Edan Itzkovitz from the CBCD. The studies showed that the Novirin and Gene-Eden-VIR formula is effective against the herpes simplex virus, and other viruses. The clinical studies were published in the peer reviewed, medical journal Pharmacology & Pharmacy, the first, in a special edition on Advances in Antiviral Drugs. Study authors wrote that, "individuals infected with the HSV ... reported a safe decrease in their

symptoms." (3)

Both products can be ordered online on the Novirin and Gene-Eden-VIR websites, here:

<http://www.gene-eden-vir.com>

and

<http://www.novirin.com>

Novirin and Gene-Eden-VIR are natural antiviral dietary supplements. Their formula contains five natural ingredients: Selenium, Camellia Sinesis Extract, Quercetin, Cinnamomum Extract, and Licorice Extract. The first ingredient is a trace element, and the other four are plant extracts. Each ingredient and its dose was chosen through a scientific approach. Scientists at polyDNA, the company that invented and patented the formula, scanned thousands of scientific and medical papers published in various medical and scientific journals, and identified the safest and most effective natural ingredients against latent viruses.

To date, Novirin and Gene-Eden-VIR are the only natural antiviral products on the market with published clinical studies that support their claims.

A genital infection with the herpes virus that causes Dyspareunia "can be detrimental to your sex life and ultimately may lead to relationship difficulties. It can be a vicious cycle, with pain leading to nervousness about sex (intercourse), and nervousness leading to dryness and further pain. It's also not uncommon for dyspareunia to remain after the cause has been treated, particularly if things have been left untreated for a while. For this reason, it is important to seek help early, so that treatable causes can be discovered and managed." (2)

The CDC notes that "the only way to avoid STDs is to not have vaginal, anal, or oral sex. If you are sexually active, you can do the following things to lower your chances of getting herpes: Being in a long-term mutually monogamous relationship with a partner who has been tested and has negative STD test results; Using latex condoms the right way every time you have sex. Herpes symptoms can occur in both male and female genital areas that are covered by a latex condom. However, outbreaks can also occur in areas that are not covered by a condom so condoms may not fully protect you from getting herpes." (4)

Are there effective herpes treatments?

Until now, drugs approved for the treatment of HSV infections include penciclovir, acyclovir, famciclovir, and valaciclovir. However, their effectiveness is limited. For instance, "a meta-analysis of five placebo-controlled and two dose comparison studies evaluated the effect of aciclovir, famciclovir or valaciclovir on symptoms. The meta-analysis showed that oral antiviral therapy decreases the duration and the associated pain of an outbreak by merely one day." (3) Unlike drugs or vaccines, which target the active herpes virus, there are two natural remedies that target the latent HSV. These clinically backed remedies are Novirin and Gene-Eden-VIR.

"Women concerned about the effect of the latent HSV on their bodies, should take Novirin or Gene-Eden-VIR." - Greg Bennett, CBCD
