ITpreneurs' Cloud TTTs Prepare Training and Consulting Providers for 2016 Cloud Certification Uptake

ITpreneurs responds to the rising demand for cloud training with a series of train-the-trainer sessions for instructors.

ROTTERDAM, SOUTH-HOLLAND, NETHERLANDS, January 21, 2016 /EINPresswire.com/ --

> "
> The reality is we're seeing an increase in the demand for cloud computing training and certification. We expect this growth to continue in 2016.
> *Arjan Woertman, VP R&D, ITpreneurs*

ITpreneurs has prepared a series of free virtual cloud train-the-trainer sessions to kick-off 2016. These sessions are ITpreneurs answer to the rising demand for training to develop cloud competencies. In a few concise online sessions IT training and consulting partners can prepare to offer cloud training quickly.

A service provider to many of the world's leading training and consulting providers, ITpreneurs sees the evolution of IT training and certification demands. "The reality is we're seeing an increase in the demand for cloud computing training and certification. We expect this growth to continue in 2016." said Arjan Woertman, ITpreneurs' VP R&D. In response to the demand, ITpreneurs is offering cloud instructors free, quick, virtual TTTs to get themselves accredited to deliver the sought after cloud trainings.

The TTTs are part of the ITpreneurs Early Adopter Train the Trainer program which is designed to support partners efficiently train their instructors. In addition to getting familiarized with the ITpreneurs courseware, instructors gain background on the market for the specific training, and tips and tricks for effective and engaging course delivery. Instructors also receive complimentary instructor packages and exams for a limited time after the TTT.

The sequence of TTTs is designed to facilitate quick on-boarding of instructors to serve cloud training early on in 2016. Among the scheduled cloud TTTs are the Cloud Credential Council accredited Cloud Technology Associate (CTA) and Professional Cloud Developer (PCD) certifications. The CTA is a solid starting point for technical and business professionals to get a balanced foundation in cloud computing. As the name denotes, the PCD certification focuses on adapting software developers to cloud computing infrastructure.

> Cloud Technology Associate TTT - February 2, 2016

> Professional Cloud Developer TTT - February 5, 2016

About ITpreneurs

ITpreneurs is the leading provider of IT training content and services worldwide. Our partners are training and consulting organizations who make use of our library of courseware, certifications and services to develop the technical and management skills of millions of end learners. The library covers both technical and management competencies for certification and non-certification courses. Access to it, along with the training-related services such as trainer certification and accreditation, enables partners to grow their business and offer new courses without having to make investments in content development and maintenance.
