Microsoft Project Standard 2016 in cloud - Software as a Service (SaaS) - AppOnFly

Microsoft Project Standard 2016 is now available for a monthly subscription as a remote desktop software from cloud.

SAN FRANCISCO, CALIFORNIA, UNITED STATES, January 29, 2016 /EINPresswire.com/ -- Whether you are a single user or an organization you can now easily access Microsoft Project from cloud without downloading or installation.

Microsoft Project is readily available as a free 30day trial. When the user decides to subscribe to Microsoft Project online they will pay just a fraction of the standard on-premise offline package.

Mac or iOS users have now an easy alternative to official Apple supported offline Microsoft Project apps.

More about Microsoft Project Standard 2016

Users can keep their projects organized and on track with Project Standard 2016. MS Project allows to take advantage of flexible features that help the user get started and make their work more efficient and productive. Easily create modern reports to measure progress and communicate project details effectively with your team and stakeholders.
