

Plas-Tech Coatings Introduces New Process for SPC11, Earns Fastener Coater Certification

Plas-Tech's new process for DuPont's SPC11-compliant Teflon® coatings has earned the company Authorized Fastener Coater certification from Intech Services.

WEST CHESTER, PA, USA, January 29, 2016 /EINPresswire.com/ -- In response to DuPont's new line of SPC11-compliant Teflon® fastener coatings, Plas-Tech Coatings has developed a new process for coating application under SPC11 and, in turn, has earned the company's approval by Intech Services as an Authorized Fastener Coater. Working in close partnership with Intech Services, this new process meets or exceeds the following requirements:

- Pass 1000 hours of salt spray per ASTM B117
- Pass Cross Hatch Adhesion Testing to ensure proper substrate adhesion
- Pass MEK rub test to ensure proper curing
- Pass Appearance Test
- Demonstrate process and quality testing for coating and or plating processes

This consistent commitment to innovation reflects' Plas-Tech's long history of producing best-in-class solutions for a wide range of coating challenges. The company will continue to focus on providing the most cost-effective industrial coating solutions in the industry into 2016 and beyond.
