

MC2 Solar's Tampa Solar Panel Installation Services Voted Best in Class for Residential Solar Panel Installations

One of Florida's top-performing solar companies fuses technologically-advanced solar panels with the leading micro-inventors of the solar-powered industry.

TAMPA, FLORIDA, UNITED STATES, February 8, 2016 /EINPresswire.com/ -- MC2 Solar, one of the Florida's top-performing solar companies, and its [Tampa solar panel installation](#) services has been voted best in class for residential solar panel installations. As the brainchild of Keith Allman and Greg Gary, who have been running and overseeing successful businesses for over 15 years, MC2 Solar has been taking the solar business in Florida by storm ever since 2015, the group combining the most technologically advanced solar panels with the leading micro-inventors of the solar-powered industry. As such, the company has been recognized for its commitment to efficient, clean energy and quality customer service as it joins the solar movement and contributes to saving the planet.

"MC2 boasts a proven record of accomplishment and remains a reputable company doing business in the United States," says MC2 Solar's Keith Allman. "We ensure that all projects are completed with the utmost professionalism, using quality materials while offering our treasured clients the

support and accessibility they demand. For us, honesty is the only policy, and we strive to complete all renewable energy resource projects with integrity – not just with our clients, but also with our suppliers and staff team members. With many successful projects to our credit, we are proud to be

Premium Solar Panel Company

one of the most trusted solar panel entities in the U.S., and are equally proud to be voted best in class for residential solar panel installations.”

MC2 Solar panels undergo quality checks during every second of the manufacturing process, guaranteeing exceptional solar electricity power performance for a minimum of 25 years. According to MC2 Solar representatives, there has never been one product recalled in the company’s entire history.

“We flash-test and then plus-sort our solar panels, which is a fancy way of saying we do everything we can to ensure the greatest energy yield, thus delivering more power to our clients,”

adds MC2 Solar’s Greg Gary. “Indeed, our solar panels are designed, tested and manufactured with attention to every conceivable detail; the result is maximum energy output for our clients’ investment.”

Tampa Solar-Panel Installations

Because solar cells are the current engines that power solar panels, MC2 Solar refuses to let outside parties make them. To guarantee peak performance and reliability, the company’s engineers apply stringent quality requirements on all materials before manufacturing its solar cells in the United States. The process, say MC2 Solar reps, allows proprietary components and processes to exceed the current industry standards.

“

We ensure that all projects are completed with the utmost professionalism, using quality materials while offering our treasured clients the support and accessibility they demand.

Keith Allman

MC2 Solar team members commit themselves to completing all projects within the timeline set by their clients, and through the use of the most premium of tools and technology they ensure that all jobs complete quickly – but with as much attention-to-detail as is necessary to ensure everything is

correct.

About MC2 Solar

Based in and serving the Tampa, Florida area, MC2 Solar is the brainchild company of Keith Allman and Greg Gary, who have been successful in business for over 15 years. With a myriad of professional skills to their credit, the duo took the solar business by storm in the summer of 2015 when they launched MC2 Solar, which has become one of the top-performing [solar panel installation companies](#) in the Sunshine State.

The MC2 Solar team dynamically fuses the most technologically-advanced solar panels with the leading micro-inventors of the solar-powered world and includes an install group led by a master electrician who trains others in photovoltaic installation and electrical engineering processes. Through an unyielding commitment to efficient, clean energy and quality customer service, MC2 Solar guarantees its clients that they will be thrilled with their decision to join the solar movement and start saving the planet.

As a top-of-the-line solar service provider with the experience and expertise to provide its clients' home or business with [premium solar panel installations](#), MC2 Solar oversees the entire process from start to finish, providing a single point of contact and continued support after the sale and when installation is complete. If clients have any questions before, during or after the installation process, the company is always there to answer them and, what's more, if there are concerns that a solar panel isn't operating correctly, MC2 Solar representatives are always available to fix it.

Throughout the entire lifetime of a system, MC2 Solar prides itself on providing unmatched support and service.

MC2 Solar is located at 2906 West Swan Avenue in Tampa, and can be reached by calling (813) 475-6513. For more information visit www.MC2Solar.info or email Keith@MC2Solar.info.
