Vista System slider signs present a clever option for food courts and restaurants...

SARASOTA, FLORIDA, UNITED STATES, February 17, 2016

/EINPresswire.com/ -- As part of its vision to provide a complete solution for any way-finding project, Vista System, a world leader in Modular way finding signage systems, has recently launched its Slider Signs. Slider signs realize the needs of the business environment. Any business can benefit from one sign that functions, with alternating graphics, as a multiple way-finding solution! It is both clever and cost effective.

Particularly in busy food courts and express restaurants located in high traffic areas, slider signs are the perfect way to tackle service issues. With simple alternating graphics, tables can be easily reserved for pre-ordering customers; waiters and service givers can quickly identify clients in need of service (who use the sign as a signal to the staff); traffic can be easily conducted from pit-stop to pit-stop on the way from choice to cash-register, and much more.

Vista System offers various slider signs, from the most basic with a top polycarbonate sliding element; through a fully finished aluminum slider extrusion, moving across the sign frame; and culminating with the new version: a combination of a slider element, embedded into an existing aluminum wall sign, allowing interchangeable graphics on top, while the bottom slider provides the necessary "Occupied / Free" function. That innovative sign is meant to be used as both an advertising or menu carrier (best visible as a table sign), while the bottom slider conveys a clear message to the staff such as "waiting on service / currently served" type of thing.

Now it is easier than ever before: If you are in the food business, call your sign professional today and ask for Vista System's Slider solution. It will upgrade your business tenfold.
