

# Mixing In Stirred Tanks - A One Day Training Course 31st March 2016, New Brunswick, NJ.

SAN ANTONIO, TX, USA, February 18, 2016 /EINPresswire.com/ -- Tridiagonal Solutions Inc, is organizing [Mixing in Stirred Tanks](#) - a one day training program to enable chemist and chemical engineers with the latest mixing calculations and scale-up methods in the chemical process industry space.

This course will review principles of mixing in stirred tanks, provide recommendations for process design and scale-up, plus enable participants to apply these principles and recommendations to their mixing processes/problems. Additionally the course will explain how “[MixIT](#) – an enterprise software to predict stirred tank performance” can help facilitate knowledge management, collaboration and use of mixing science within a global organization to accelerate reactor design, process scale up, process optimization and troubleshooting associated with stirred tanks.

The training is taking place on Thursday 31 March 2016, 8 am EST at Rutgers University Inn and Conference Center, New Brunswick, New Jersey. Registration instructions are available on the event website [Mixing In Stirred Tanks](#)

The training is conducted by Dr. Gopal Kasat, who leads the Chemical Reactor Engineering Group at Tridiagonal Solutions. He holds a Doctorate degree in Chemical Engineering from the University Institute of Chemical Technology. Over the last 13 years Gopal has been focused on R&D, Design and Scale up of stirred tank reactors. His graduate research was on understanding gas-liquid and solid-liquid flows in stirred tank reactors using experimental methods and computational modeling.

## About MixIT

MixIT, a comprehensive, easy-to-use enterprise analysis software designed to predict stirred tank mixing performance, with a unique capability of automated CFD analysis. MixIT enables enterprises to design, compare, scale-up (plant to lab scale) and analyze the performance of multiple stirred tank reactors and bioreactors, by using standard correlations and advanced CFD models.

## Mixing In Stirred Tanks

### A One Day Training Course

31 March 2016 | New Brunswick, NJ

**Live Demonstrations**  
**Problem Solving Sessions**  
**One Month Free MixIT Trial License**

## About Tridiagonal Solutions Inc

Tridiagonal Solutions Inc is an advanced engineering solutions provider with expertise in process performance enhancement and product development solutions for industrial clients worldwide. Their portfolio includes process engineering, CFD, EFD, Discrete Element Modeling services and chemical mixing simulation products . Tridiagonal Solutions caters to the Chemical and Process, Oil and Gas, Consumer goods, Food, Electronics, Power Generation and Healthcare Industries.
