

# Imperial Systems DeltaMAXX Filters Offer Superior Dust Collection Efficiency

*Read our customer testimonial to see why DeltaMAXX filters from Imperial Systems saves you money*

JACKSON CENTER, PENNSYLVANIA, UNITED STATES, February 24, 2016 /EINPresswire.com/ -- Imperial Systems DeltaMAXX dust collector filters have proven their worth in many manufacturing industries that deal with combustible dust or harmful smoke from welding or laser cutting. Built for longevity with premium quality and endurance, the DeltaMAXX dust collector filters deliver twice the service life, ultra-clean air, and unparalleled cost savings. No matter how challenging the operation conditions, the DeltaMAXX sets the new standard of excellence for dust collector filters.

Already known for their popular CMAXX Dust collector, Imperial Systems also has filters for nearly every type of dust collection system in the market. This is an advantage to its customers as they only need to call one company to handle all of their dust collection and air quality needs.

Imperial's customers speak highly of their experience when buying DeltaMAXX Filters. This customer uses a Camfil Farr Gold Series dust collection system, but decided DeltaMAXX filters, instead of the collector manufacturer's filters, was the best choice for them:

“

I would recommend the DeltaMAXX replacement filters to any company looking for industrial filters.

*Jevon S.*

“I first came in contact with Imperial Systems when one of their sales team members reached out to our company. When it was time for us to buy new filters, we gathered quotes from many different companies. As a result, we found Imperial Systems had the best quality filter at an affordable price so we went ahead and purchased our filters from them. The Imperial Systems customer service was magnificent. Our new filters were provided to us in a timely manner and there has always been a quick turnaround with any questions we needed

answers to. All the information about the DeltaMAXX filters was completely accurate and the quality of the filters is superior to competitors. I would recommend the DeltaMAXX replacement filters to any company looking for industrial filters. The company is knowledgeable, the product is efficient, and the price is right.”

Jevon S – Major Woodworking Company
