

# Meeting Qatar's healthcare demand with innovative solutions

*It is essential for health facility developers and design experts to develop facilities in Qatar designed to effectively meet demand to the highest quality.*

DOHA, QATAR, March 7, 2016 /EINPresswire.com/ -- 7 March 2016 – Doha, Qatar

There is no doubt that Qatar's population is accelerating at a fast pace and it is essential that health facility developers and design experts develop facilities which are designed to effectively meet demand to the highest quality.

Innovative design is one of the solutions that many in Qatar are turning to. However, common challenges and questions exist as to what design constitutes a 'world-class facility', how to 'future-proof' healthcare facilities where future population sizes are uncertain, and what technologies should be incorporated to achieve efficiency and flexibility in healthcare facilities.

These challenges will be discussed by leading healthcare and design professionals at the 2nd Annual Health Facilities Design and Development conference in Doha, Qatar, on 28-29 March 2016.
