

Lollicup® USA brings in more eco-friendly products

CHINO, CA, UNITED STATES, March 1, 2016 /EINPresswire.com/ -- Lollicup USA Inc. is continuing its efforts to bring more environmentally friendly products to its customers by increasing its line of bagasse products.

Karat® Earth has added three bowl sizes to its existing eco-based bagasse line, which is BPI certified. Lollicup now offers bowls, plates and hinged containers in various sizes. A recyclable PET lid to fit 9" bagasse plates was also recently released. These lids keep food fresh and warm, and they allow for easy takeout meals.

Bagasse is made from the remaining fibers of sugar cane stalk. These fibers are extremely durable, which is why it is so perfect for disposable packaging.

With the addition of these products, Karat Earth has everything needed to run an environmentally friendly operation. Karat customers can now serve their foods, drinks and desserts in nothing but sustainable materials. This includes Karat® Earth PLA plastic cups, lids and deli containers.

Lollicup USA began its sustainable Karat Earth line several years ago to give customers the option to do their part to reduce waste. By encouraging customers to adopt more eco-friendly practices, the company hopes to help reduce the amount of waste that piles up in landfills.

About Lollicup® USA, Inc.
