

# Gene-Eden-VIR Antiviral Benefits are Now Objective

*Customers of Lilac Corp. are now able to objectively measure the effectiveness of Gene-Eden-VIR.*

ROCHESTER, NEW YORK, UNITED STATES OF AMERICA, March 9, 2016 /EINPresswire.com/ --

“Infected with the herpes or HPV viruses (HSV-1, HSV-2, or HPV)? We recommend taking [Gene-Eden-VIR](#) or [Novirin](#).” – Greg Bennett, CBCD

What is the number one problem with most dietary supplements? Individuals have no way of knowing if they actually work. As a result, people take these supplements on a faith based basis. They might continue taking them for years for nothing. They may spend a lot of money with no health benefit whatsoever. This problem enticed Lilac Corp. to look for an objective measure that would tell the users of Gene-Eden-VIR how they respond to the supplement.

Through a scientific questionnaire, which is administered over the phone, and which is included in the price of a bottle of Gene-Eden-VIR, customers of Lilac Corp. can now see, in detail, how their bodies react to the formula of this natural product. The questionnaire was developed by the Center for the Biology of Chronic Disease (CBCD).

According to Greg Bennet of Lilac Corp., “Many of our customers are people who prefer scientifically backed treatments against viral illnesses. Most companies

that manufacture oral supplements don't have any sort of clinical studies that provide evidence to back the effectiveness of their natural formulas. We therefore decided to stand out from the crowd and provide our customers with a great reason to trust us. Not only does the formula of Gene-Eden-VIR have two clinical studies that back its claims, but customers can now take advantage of a scientific questionnaire that was developed to help the user track their

recommends that individuals concerned about infection with the latent herpes virus (HSV-1 or HSV-2) or with the human papillomavirus (HPV, take Gene-Eden-VIR or Novirin. The formula of these natural antiviral supplements was designed to help the immune system target these latent viruses. Additionally, it was found to reduce symptoms associated with these viruses in two separate post-marketing clinical studies that followed FDA guidelines.

The formula of Novirin and Gene-Eden-VIR was tested by Hanan Polansky and Edan Itzkovitz from the CBCD. The studies showed that the Novirin and Gene-Eden-VIR formula is effective against the herpes simplex virus, the human papillomavirus, and other viruses. The clinical studies were published in the peer reviewed, medical journal Pharmacology & Pharmacy, the first, in a special edition on Advances in Antiviral Drugs. Study authors wrote that, "individuals infected with the HSV ... reported a safe decrease in their symptoms following treatment with Gene-Eden-VIR." (1) The study authors also wrote that, "we observed a statistically significant decrease in the severity, duration, and frequency of symptoms." (1)

Both products can be ordered online on the Novirin and Gene-Eden-VIR websites, here:

<http://www.gene-eden-vir.com>

and

<http://www.novirin.com>

Novirin and Gene-Eden-VIR are natural antiviral dietary supplements. Their formula contains five natural ingredients: Selenium, Camellia Sinesis Extract, Quercetin, Cinnamomum Extract, and Licorice Extract. The first ingredient is a trace element, and the other four are plant extracts. Each ingredient and its dose was chosen through a scientific approach. Scientists at polyDNA, the company that invented and patented the formula, scanned thousands of scientific and medical papers published in various medical and scientific journals, and identified the safest and most effective natural ingredients against latent viruses.

To date, Novirin and Gene-Eden-VIR are the only natural antiviral products on the market with published clinical studies that support their claims.

Gene-Eden-VIR and Novirin work best after taking these supplements for at least 3 months.

"After purchasing Gene-Eden-VIR or Novirin, we recommend that you call Lilac Corp. and set an appointment for a phone interview, during which you will be asked to answer the questions in the questionnaire. The results will tell you, in detail, how your body reacts to the supplement, and will help you track your progress. The phone interview is free of charge." – Greg Bennett, CBCD
