

Clinical Study: Gene-Eden-VIR Decreases Viral Symptoms in Six Weeks or Less

Many individuals infected with the latent HSV or HPV experience a reduction in symptoms within a six week time frame.

ROCHESTER, NEW YORK, UNITED STATES OF AMERICA, March 10, 2016 /EINPresswire.com/ --

“Infected with the herpes or HPV viruses (HSV-1, HSV-2, or HPV)? We recommend taking [Gene-Eden-VIR](#) or [Novirin](#).” – Greg Bennett, CBCD

Lilac Corp., the company that markets Gene-Eden-VIR and Novirin has received many requests from customers to know how long they must take the product before seeing results. Gene-Eden-VIR and Novirin are all natural, antiviral, oral supplements designed to work against the latent herpes and HPV viruses. Additionally, users of Gene-Eden-VIR and Novirin frequently call in to learn exactly how to use these products.

The Center for the Biology of Chronic Disease (CBCD), the organization that clinically tested the effects of the Gene-Eden-VIR and Novirin formula, notes that many users of Gene-Eden-VIR reported that they saw results within six weeks of taking one of these antiviral products. “It takes 4-6 weeks from the time you start taking Gene-Eden-VIR to the time you start seeing results. Unlike drugs, the changes with this natural remedy are gradual, and sometimes easily missed. Consider the following quote from the clinical study that was published in the journal Pharmacology and Pharmacy, “The results showed that (the Gene-Eden-VIR formula) has a duration effect ($p = 0.044$, $n = 32$), that is, those treated for a longer time reported a larger decrease in their symptoms.” Since 1 bottle will last for 1 month, you might need a second

bottle to start seeing results. With Gene-Eden-VIR, and many other dietary supplements, you have to be patient.” (1)

In terms of how customers should take Gene-Eden-VIR or Novirin, the CBCD notes that users should “take one capsule in the morning, and one capsule in the evening, about twelve (12) hours later. Take the product with food. If your infection is causing severe symptoms, it is recommended to double the dose. In this case, take two capsules in the morning, and two capsules in the evening, about twelve (12) hours later. Take the product with food.” (1)

The Center for the Biology of Chronic Disease (CBCD) recommends that individuals concerned about infection with the latent herpes virus (HSV-1 or HSV-2) or with the human papillomavirus (HPV, take Gene-Eden-VIR or Novirin. The formula of these natural antiviral supplements was designed to help the immune system target these latent viruses. Additionally, it was found to reduce symptoms associated with these viruses in two separate post-marketing clinical studies that followed FDA guidelines.

The formula of Novirin and Gene-Eden-VIR was tested by Hanan Polansky and Edan Itzkovitz from the CBCD. The studies showed that the Novirin and Gene-Eden-VIR formula is effective against the herpes simplex virus, the human papillomavirus, and other viruses. The clinical studies were published in the peer reviewed, medical journal Pharmacology & Pharmacy, the first, in a special edition on Advances in Antiviral Drugs. Study authors wrote that, “individuals infected with the HSV ... reported a safe decrease in their symptoms following treatment with Gene-Eden-VIR.” (2) The study authors also wrote that, “we observed a statistically significant decrease in the severity, duration, and frequency of symptoms.” (2)

Both products can be ordered online on the Novirin and Gene-Eden-VIR websites, here:

Novirin and Gene-Eden-VIR are natural antiviral dietary supplements. Their formula contains five natural ingredients: Selenium, Camellia Sinesis Extract, Quercetin, Cinnamomum Extract, and Licorice Extract. The first ingredient is a trace element, and the other four are plant extracts. Each ingredient and its dose was chosen through a scientific approach. Scientists at polyDNA, the company that invented and patented the formula, scanned thousands of scientific and medical papers published in various medical and scientific journals, and identified the safest and most effective natural ingredients against latent viruses.

To date, Novirin and Gene-Eden-VIR are the only natural antiviral products on the market with published clinical studies that support their claims.

Gene-Eden-VIR and Novirin work best after taking these supplements for at least 3 months.
