

# Colon Rectal Patient Receives Restorative Stem Cells after Tumor Substantially Shrink's in Several Weeks

*Restorative Stem Cell Therapy Follows SonataPlus Stage III Cancer Treatment*

HONOLULU, HI, UNITED STATES,  
March 30, 2016 /EINPresswire.com/ --  
Gregory DiRienzo, CEO of [New Life Cancer Centers](http://www.newlifecancercenters.com)  
([www.newlifecancercenters.com](http://www.newlifecancercenters.com))

announces that its highly respected oncologists and affiliate stem cell physicians have re-implanted approximately 150 million cultured

autologous bone marrow stem cells back to the patient after the cancer has shown full remission and tumor has become completely necrotic or reduced significantly by way of SonataPlus, an advanced tumor specific immuno-chemo therapy regime performed by New Life Cancer Center affiliates, first introduced by internationally recognized research oncologist and clinician, Baofa Yu, M.D. Restorative stem cell therapy applied by New Life Cancer Center physicians is intended to restore the patient's overall homeostasis and an immune system often compromised by cancer progression and/or undergoing protracted conventional cancer therapies.

New Life Cancer Center physicians have administered autologous bone marrow and/or hematopoietic stem cells to over 3,500 patients since 2003. It is well established that a patient's own bone marrow aspirate contains a trove of healing multipotent stem cells, including mesenchymal, pluripotent stem cells, and small embryonic-like stem cells each offering therapeutic benefits to the patient.

Autologous stem cells are known to induce direct stimulation and regeneration of the patient's immune system and invoke immune surveillance capabilities often adversely affected by conventional cancer therapies, stimulation of greater T-cell activity through transfer factor, implantation of dendritic cells or dendritic cell vaccines, and passive lymphocyte transfer, etc.

Alan Morell, Creative Management Agency Appointed New Life Cancer Centers has appointed Alan Morell, CEO of the internationally recognized the CREATIVE MANAGEMENT AGENCY to develop New Life Cancer Center's overall growth strategy and market positioning for global cancer patients sectors. The Agency is responsible for an overall marketing strategy, including identifying relevant cancer support associations for media campaigns. Mr. Morell coordinates with hundreds of news affiliates including Fox, MSNBC, and CNBC, among others, for both live appearances and taped interviews. The client list ranges from select individuals in Literary; Broadcast; Sports, Entertainment, the Arts, to Global Corporations.
