

Primera Technology Ink Cartridges in Stock and Ready to Ship From DuraFast Label Company's Canadian Distribution Center

Leading Canadian retailer of Primera label printers now carrying LX400, LX500, LX800/810, LX900 and LX2000 replacement ink cartridges & blank labels.

TORONTO, ONTARIO, CANADA, April 1, 2016 /EINPresswire.com/ -- DuraFast Label Company (www.DuraFastLabel.ca), a Toronto-based business serving its customer base with quality color label printing solutions and more, announced that its inventory of [Primera Technology ink cartridges](#) are in stock and ready to ship from its Toronto distribution center. As the leading Canadian retailer of [Primera color label printers](#) and supplies, DuraFast now carries the Primera LX400, LX500, LX800/810, LX900 and LX2000 standard replacement ink cartridges compatible with specific Primera label printers.

"Though some ink cartridges are compatible with multiple printers, Primera Technology label printers tend to favor their own unique Primera inks," states Basat Khalifa, president of DuraFast Label Company. "When it comes to Primera toners and Primera inks, no other source in Canada can compete with DuraFast – in fact, we invite customers residing or doing business in Toronto, Ontario to stop by our showroom during our normal business hours and stock up on Primera printing supplies. Needless to say, we're all about serving our valued client base."

Primera LX400 ink cartridges are compatible with the LX400, LX800 and

Primera LX900 color label printer

Primera LX400 color label printer

LX810 printers, with the LX400 using only a single multicolor ink cartridge as compared to the LX800 and 810, which use both a multicolor and black Primera Technology ink cartridge. Additionally, dye-based black and pigment black LX800 cartridges – as well as LX810 ink cartridges – are available. The LX500 color label printer, set to be available through DuraFast in April, will use single multicolor LX500 ink cartridge in the same manner as its predecessor, the Primera LX400, with the cartridges expected to be similar to LX400 variants.

With regard to the LX900 and LX2000 and their Primera inks, Canadian and U.S. DuraFast customers can choose from LX900 ink cartridges with either dye-based or pigment-based inks, with usage of the new pigment LX900 cartridges requiring the semi-permanent pigment ink print head for the LX900 printer. Irrespective of ink type, the LX900 uses individual ink cartridges for cyan, magenta, yellow and black ink, with these cartridges unique to the LX900 label printer.

Primera LX900 dye based ink cartridges

According to DuraFast Label Company representatives, all of the Primera LX900 labels are only compatible with the LX900 dye-based inks, but techs can make custom labels to use with the pigment LX900 inks on a more diverse set of label materials. The LX2000 inks can also be used with all the Primera LX900 labels.

DuraFast Label Company ships the Primera printers, Primera inks, [Primera labels](#) and accessories to customers across Canada via both UPS and Canada Post for quick and efficient delivery.

DuraFast Label Company is located at 53 Queen's Plate Drive Unit 2 in Toronto, Ontario, and can be reached by calling +1 (866) 299-0066. For more information visit www.DuraFastLabel.ca.
