

# Kenya Wildebeest Migration

*Come with us on a journey to the Masai Mara Game Reserve where you view Africa's big five, witness the wildebeest migration or interact with the Masai tribe*

NAIROBI, NAIROBI, KENYA, April 2, 2016 /EINPresswire.com/ -- The Great [Kenya Wildebeest Migration](#) is one of the most spectacular natural events that can be witnessed in a life time. Millions of nomadic wildebeest migrate between the Masai Mara (Kenya) and the Serengeti National Park (Tanzania) along with thousands of zebras and antelopes. The sheer breathtaking size of this mass migration has earned it a place as part of the wonders of the world.

The spectacle is at its peak, when large herds of wildebeest, zebras and antelope gather on the shores of the crocodile infested Mara River. Getting ready to cross the river the herds grow more and more agitated, crocodiles move in place patiently hoping to have their fill while other carnivores (mainly big cats) stealthily wait on the other side for a meal opportunity. The atmosphere becomes filled with excitement and when the nerves become overwhelming, some wildebeest jump in the river in a seemingly suicidal act, thus triggering an avalanche pouring down into the Mara
