

Middle East militaries focused on integrating C4ISR systems

The C4ISR Middle East Summit is taking place from 31 May-1 June 2016 in Abu Dhabi, UAE. Regional militaries to discuss how to improve their C4ISR capabilities.

ABU DHABI, NON-US, UNITED ARAB EMIRATES, April 7, 2016 /EINPresswire.com/ -- The 4th Annual C4ISR Middle East Summit is taking place from 31 May - 1 June 2016 in Abu Dhabi, UAE, to enable decision makers from regional militaries to discuss how to improve their C4ISR capabilities, learn best practices from international tri-service leaders and review the latest technology available in the market.

The threats faced by the GCC and its allies are becoming increasingly asymmetrical in nature - this demands even more from C4ISR systems, with an enhanced need for war fighters to be able to distinguish between military and civilian targets in real-time and effectively share information between different partners without hesitation.
