

Syncplify.me Server! Now Available on AWS Marketplace

Syncplify.me Server! is now available on AWS Marketplace offering top security with hassle-free deployment, a 15-day free trial, and no up-front license fees

WILMINGTON, DE, UNITED STATES, April 11, 2016 /EINPresswire.com/ -- Syncplify, Inc., a young and dynamic US-based software development company, has released [Syncplify.me Server!](#), a highly secure [SFTP server](#) available on Amazon Web Services Marketplace (AWS Marketplace).

Syncplify.me Server! on AWS delivers the same level of security as its on-premises brother product, but without the need to go through a complex, lengthy installation procedure, and with no up-front traditional licensing fees. In fact, after the 15-day trial period, Syncplify.me Server! on AWS is charged on an hourly basis only for the actual usage.

“From a technical standpoint, making our software available on AWS Marketplace was a great choice to deploy a very secure file transfer server onto a highly reliable, globally available infrastructure,” said Fjodr Soyevskji, Chief Technology Officer at Syncplify, Inc.

“We believe that this relationship with AWS will greatly benefit our customers, especially those who need to deploy highly dynamic, secure, file transfer infrastructures that change frequently over time,” said Helga Kessler, Chief Operation Officer.

Customers can deploy the Syncplify.me Server! edition they need (Basic, Professional or Ultimate) on AWS, and they can choose between Windows Server 2008 R2 and Windows Server 2012 R2 EC2 instances.

About Syncplify

Syncplify, Inc. is a young and dynamic ISV that aggregates several software designers and developers from around the world, each of them with at least 15 years of experience in secure file transfer solutions. Syncplify provides corporations, government and financial institutions, and several

law-enforcement and security agencies with the most secure file transfer server and client software.
