

# Military Helicopters Modernisation & Upgrade Plans Unveiled by Central and Eastern European Nations this May in Budapest

*HTEE 2016 has heard high praises from Major General Bohuslav Dvorak, Former Deputy Chief of the General Staff, Czech Armed Forces*

BUDAPEST, HUNGARY, April 11, 2016 /EINPresswire.com/ -- General Dvorak says, "Multinational operations still remain reliant on interoperability of approach, communication and systems. Rotary fleets must be modernised and upgraded across Europe and the need for multipurpose aircraft is a priority for many. There is therefore a need for a high level meeting that brings together senior military leadership, project decision makers and technical experts alongside the helicopter manufacturers and cutting edge industry solution providers to collaborate on future endeavours that will enhance the security and stability of Central Europe and its neighbouring countries. I believe [Helicopter Technology Eastern Europe](#) 2016 is the perfect environment for this collaboration, hence lending my support behind [the conference](#) as chairman."

The conference has seen some great additions to its event agenda with four respected defence experts joining the speaker line-up. This includes:

Meet and network with the region's most focused and senior military helicopter experts from Czech Republic, UK, Ukraine, Italy, Slovak Republic, Denmark, Sweden, Netherlands, Italy, France and more...
