

Electro Chemical Expands to Offer Dual Laminates

Electro Chemical is partnering with Guyle McCuaig to form new business, Superior Dual Laminates, Inc. (SDL)

EMMAUS, PA, USA, April 14, 2016 /EINPresswire.com/ -- [Electro Chemical](#) is pleased to announce its partnership with Guyle McCuaig to form a new business, Superior [Dual Laminates](#), Inc. (SDL). This partnership expands Electro Chemical's breadth of lining solutions for Chemical Processing Industry customers.

Electro Chemical, a company specializing in corrosion protection for over sixty-five years, supplies fluoropolymer-lined steel equipment using sheet lining, baked coatings and roto-molding technologies. McCuaig brings fluoropolymer lined fiberglass technology for both tanks and piping to the new SDL venture.

The partnership takes advantage of significant advancements in technology from Electro Chemical, such as helium leak testing of [fluoropolymer linings](#), permeation testing and application of the latest high temperature bonding adhesives. Combining these advances with state of the art dual laminate fiberglass technology brings together two powerful tools for combating corrosion in storage tanks, reactors, columns and piping.

For decades, Electro Chemical has delivered high quality fluoropolymer linings to protect steel tanks and equipment from severe chemical corrosion. Now, SDL corrosion protection a step further, offering a new suite of liner solutions for the FRP tank and equipment market.

Mike Bunner, President of Electro Chemical, explains, "We wanted to create a one-stop resource for our clients. With our new capacities, chemical processing companies can work with a single provider for both lined-steel and lined-FRP equipment and tanks. We're excited about how much time this will save clients as well as how it will improve the workflow of their projects."

"Electro Chemical will be able to provide essentially any thermoplastic liner material customers need," according to Bunner. "It's a rarity for our industry," he adds.
