

Alexander Gabriel 3d Printed Watch Company Launches Kickstarter Campaign

Custom 3d Printed Watches from the Space Coast of Florida

PALM BAY, FLORIDA, UNITED STATES, April 18, 2016 /EINPresswire.com/ -- PALM BAY, FL - 4/18/2016 -- Alexander Gabriel Watch Company, Inc., a locally-made watch company, has launched its Kickstarter campaign to raise funds for its STEM related watch company. The company has developed key partnerships with XLN Technologies, a company that sells and services electronics, and the Space Coast Fablab, a Florida nonprofit dedicated to helping individuals grow through courses and project-based learning. Alexander Gabriel Watch Company, Inc. is also partnering with the engineering department at Florida Institute of Technology in Melbourne, Florida.

Each of the company's timepieces are 3D printed in various special composites and hand-assembled locally with Swiss mechanical movements, sapphire crystal and custom handmade straps right on the Space Coast of Florida. All of the watch straps are hand-cut leather, hand-dyed and hand-stitched by Polito Custom Straps.

The company aims to make their watches as unique as their customers. Customers can choose the color leather and stitching they desire for their new watch as well as the dial and the Swiss Mechanical Movement of their choice. In addition, Alexander Gabriel Watch Company, Inc. will 3D print the watch box for each order and provide a name or special inscription on the box.

"We are happy to announce these partnerships and are very proud of our commitment to fine craftsmanship and to make these custom watches locally," says Roy Trent, founder and CEO of Alexander Gabriel Watch Company, Inc. "We have had a good reception to our product and so far it's really resonating with people. They appreciate we are USA made and that we are not farming out the manufacturing process overseas."

The company was started by Trent's desire to have a truly unique watch including a modern movement, classic housing, and an undeniably unique appearance. After researching and not quite finding what he was seeking, Trent had an inspirational thought about designing and producing custom watches while taking care of his young son in the middle of the night. He wanted a watch case to be crafted strong, simple and bold. And the watch itself to celebrate the lost art of taking time to do things right, a homage to the craftsmen who put the soul into the handmade generation's message of "It takes time to make time."

Alexander Gabriel Watch Company, Inc. provides their full and semi-custom watches at affordable prices and aims to be the first fully custom, affordable watch company. For more information, visit <https://www.kickstarter.com/projects/1621208896/3d-printed-watches-from-the-space-coast-of-florida>

About Alexander Gabriel Watch Company, Inc.

Alexander Gabriel Watch Company, Inc. is a locally-made watch company on the Space Coast of Florida. The company specializes in custom-made 3D printed watches and aside from Swiss mechanical movements, they design and produce all of their own parts including cases, dials, boxes

and straps. For more information, visit AlexanderGabriel.com.
