

Halal Chicken Feet, Chicken Wings And Whole Chicken

DENVER, COLORADO, USA, April 18, 2016 /EINPresswire.com/ -- [Chicken feet](#) and [chicken wings](#) are good source of minerals (calcium, magnesium, phosphorus and other trace elements), gelatin, collagen and glycine. Gelatin is found in cartilage and connective tissue in the bones. It aids digestion, especially of milk, meat, beans and grains; helps our body use the protein from meat most efficiently; improves treatment of peptic ulcers, tuberculosis, diabetes, muscle diseases, infectious diseases, jaundice and cancer; treats malnutrition and improves bone density. Unfortunately, many caged chickens (what you buy in the grocery store) have little gelatin because of their lack of exercise. You can tell if your stock has good gelatin content if it gels after cooling. [Whole chicken](#) is also a very important and integral aspect of consumption in modern life.
