

# Egyptian Upstream Operator goes-live with EnergyFlow AFE Automation

*General Office processes fully integrated with INFOR SunSystems*

CAIRO, EGYPT, April 20, 2016 /EINPresswire.com/ -- The Operator aims to improve compliance and reduce overspend by as much as 100%; which could result in an annual saving of up to US\$1.5 million.

TouchstoneEnergy's EnergyFlow provides seamless integration with Infor SunSystems which will assist further with budget control and compliance.

An approved AFE (approval for expenditure request) is automatically integrated with Infor SunSystems to create the AFE record and associated budget, enabling budget vs actual expenditure reporting.

Integration with the INFOR SunSystems budget ledgers allows unbudgeted expenditure to be quickly identified.

The core EnergyFlow AFE Automation process from TouchstoneEnergy enables the AFE to follow a defined workflow from request, completion, review and finally approval before creating the AFE budget in INFOR SunSystems.

A series of email alerts are generated that alert and inform at all stages of the process, thus enabling approvers' and managers to remain pro-active in their management of AFE related spend.
