

Introducing Credit Card Processing for Small Business that's Truly Affordable, thanks to 99MerchantAccount.com

Learn why credit card processing for small business doesn't have to be so expensive and how to save month after month with 99MerchantAccount.com

TAMPA, FLORIDA, USA, April 23, 2016 /EINPresswire.com/ -- Now, one of the top [credit card processing companies](#) is making it more affordable to accept payments on-site, off-site, and online, by cutting out many costly fees. 99MerchantAccount is a leading commerce solutions provider that's offering businesses the opportunity to save more of what they earn through every processed transaction. The results add-up to hundreds, even thousands of dollars in just one month's time.

99MerchantAccount.com is a wholesale credit card processor offering pass-through interchange pricing for small business owners. This means there is no extra rate added to the wholesale or interchange rate, the surcharge for each and every non-cash transaction.

“

The Nation's Best Wholesale Credit Card Processor for Small Businesses”

Valerie Whitt

It's a known fact the majority of [merchant account services](#) tack-on several fees for processing credit cards, debit cards, e-commerce payments, gift cards and more. Unfortunately, these fees are often wrapped up together so business owners cannot decipher what's being charged for processing payments.

99MerchantAccount.com offers the [lowest cost credit card processing](#), it works with nearly all point of sale systems, EMV credit card terminals, online merchant services, wireless processing, mobile processing, and is fully PCI DSS compliant, or, Payment Card Industry Data Security Standard compliant.

This is a significant departure from the industry standard, where several fees are incurred for payment processing. For instance, transaction fees can range between 30 cents and 45 cents for every sale. A discount rate (a serious misnomer) can also apply, costing between 1.5 percent to 5 percent of the sale amount. A statement fee is also a common charge, ranging from 5 dollars to 10 dollars. In

EMV Credit Card Machines

addition, some businesses are charged a minimum monthly fee, if there are not enough processed payments in a given month. Along with all of the above is a batch fee, charged every time data is sent, about every 24 hours.

In just one month, these seemingly insignificant fees can add up to hundreds or thousands of dollars. Money paid in credit card processing fees is derived from a business' bottom line, funds which could be used in a more productive manner. Companies across many industries and of all sizes seriously benefit from pass-through exchange pricing. Eliminating these many surcharges saves businesses real money every time a sale is processed. Business owners are urged to review their credit card processing statements to compare rates and to see firsthand how pass-through interchange pricing is more advantageous and saves money.
