

Light Therapy Market Growing on Account of Robust Adoption in Homecare Settings

Light therapy market is expected to increase at nearly 4.8% CAGR through 2026. Adoption of light therapy is quite robust in homecare settings.

VALLEY COTTAGE, NEW YORK, UNITED STATES, April 28, 2016 /EINPresswire.com/ -- Future Market Insights (FMI) delivers key insights on the global light therapy market in its upcoming report titled, "Light Therapy Market: Global Industry Analysis and Opportunity Assessment 2016 - 2026." FMI expects light therapy market to expand at 4.8% during the forecast period 2016-2026, majorly driven by its applications in the treatment of Seasonal Affective Disorder (SAD).

Increasing demand for blue light therapy procedures for treatment of various disorders and conditions, including SAD, globally is prompting manufacturers to launch blue light therapy devices to cater to the growing needs in this regard. Also, over the last few years, leading players are focusing on introducing portable light therapy devices, targeting the consumer segment, which is anticipated to witness surge in market share globally by 2026.

Treatment of acne using LED light is gaining popularity due to various benefits such as cellular regeneration and increased blood circulation. LEDs emit both blue and red light, thus offering added advantage over conventional light therapy, which in turn, is driving growth of the light therapy market globally.

Global light therapy market is segmented on the basis of product type, light type, end user and region.

On the basis of product type, the market has been segmented into light box, floor and desk lamps, light visor, dawn simulator, light therapy bulbs, and handheld devices for skin treatment. Among the various product type segments, light box segment consists the highest market share and is expected to expand at the CAGR of 4.3% between 2016 and 2026.
