PUNE, INDIA, May 2, 2016 /EINPresswire.com/ --

According to Researcher, the Global [Diabetic Retinopathy Treatment market](#) is expected to reach \$10.24 billion by 2022. Rising prevalence of diabetics, increasing management financial support, change in lifestyle and global aging population are the factors driving the market growth. However, Lack of accurate diagnosis, a lack of skilled ophthalmologist coupled with poor infrastructure and extended approval time for drugs are hampering the growth of global diabetic retinopathy market. Increase in awareness of diabetic retinopathy treatment and improvement of patient monitoring are some of the major trends in the market. The two main stages of diabetic retinopathy are non-proliferated and proliferated. Proliferated diabetic retinopathy is the mainly insecure stage and has the risk of detachment into the vitreous leading to severe vision loss.
