

Radiation Toxicity (Radiation Sickness, Acute Radiation Syndrome) Therapeutics Pipeline Industry H1 2016

The report provides an overview of the Radiation Toxicity (Radiation Sickness, Acute Radiation Syndrome) pipeline landscape.

PUNE, INDIA, May 3, 2016 /EINPresswire.com/ -- The report "[Radiation Toxicity \(Radiation Sickness, Acute Radiation Syndrome\)](https://www.wiseguyreports.com/reports/443146/radiation-toxicity-radiation-sickness-acute-radiation-syndrome-three) - Pipeline Review, H1 2016" provides comprehensive information on the therapeutics under development for Radiation Toxicity (Radiation Sickness, Acute Radiation Syndrome), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The report also covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases. Additionally, the report provides an overview of key players involved in therapeutic development for Radiation Toxicity (Radiation Sickness, Acute Radiation Syndrome) and features dormant and discontinued projects.

Complete Report Details Available at <https://www.wiseguyreports.com/reports/443146/radiation-toxicity-radiation-sickness-acute-radiation-syndrome-three> .

This report features investigational drugs from across globe covering over 20 therapy areas and nearly 3,000 indications. The report is built using data and information sourced from Global Markets Direct's proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Drug profiles featured in the report undergoes periodic review following a stringent set of processes to ensure that all the profiles are updated with the latest set of information. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

The report helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage.

Major Companies mentions in this report are:

- Aeolus Pharmaceuticals, Inc.
- Angion Biomedica Corp.
- Atox Bio Inc.
- Avaxia Biologics, Inc.
- Bolder Biotechnology, Inc.
- Caladrius Biosciences, Inc.
- Cellerant Therapeutics, Inc.
- Cellphire, Inc.
- Chrysalis BioTherapeutics, Inc.
- Cleveland BioLabs, Inc.
- Cumberland Pharmaceuticals, Inc.
- Diffusion Pharmaceuticals Inc.
- Eli Lilly and Company
- GNI Group Ltd.
- Humanetics Corporation
- INSYS Therapeutics, Inc.
- Meabco A/S
- Neumedicines Inc.
- Onconova Therapeutics, Inc.
- PharmaIN Corporation
- Pluristem Therapeutics Inc.
- ProCetus BioPharm Inc.
- RDD Pharma Ltd.
- RedHill Biopharma Ltd.
- RxBio, Inc.
- Soligenix, Inc.
- Stemmedica Cell Technologies, Inc.
- Therapio Corporation
- Tonix Pharmaceuticals Holding Corp.

Scope

- The report provides a snapshot of the global therapeutic landscape of Radiation Toxicity (Radiation Sickness, Acute Radiation Syndrome)
- The report reviews pipeline therapeutics for Radiation Toxicity (Radiation Sickness, Acute Radiation Syndrome) by companies and universities/research institutes based on information derived from company and industry-specific sources
- The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages
- The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities
- The report reviews key players involved Radiation Toxicity (Radiation Sickness, Acute Radiation Syndrome) therapeutics and enlists all their major and minor projects
- The report assesses Radiation Toxicity (Radiation Sickness, Acute Radiation Syndrome) therapeutics based on drug target, mechanism of action (MoA), route of administration (RoA) and molecule type
- The report summarizes all the dormant and discontinued pipeline projects
- The report reviews latest news related to pipeline therapeutics for Radiation Toxicity (Radiation Sickness, Acute Radiation Syndrome)

Reasons to buy

- Gain strategically significant competitor information, analysis, and insights to formulate

effective R&D strategies

- Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage
- Identify and understand important and diverse types of therapeutics under development for Radiation Toxicity (Radiation Sickness, Acute Radiation Syndrome)
- Identify potential new clients or partners in the target demographic
- Develop strategic initiatives by understanding the focus areas of leading companies
- Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics
- Devise corrective measures for pipeline projects by understanding Radiation Toxicity (Radiation Sickness, Acute Radiation Syndrome) pipeline depth and focus of Indication therapeutics
- Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope
- Modify the therapeutic portfolio by identifying discontinued projects and understanding the factors that drove them from pipeline
