Cues Sticks - Buy Original - On Sale  
Online - Authorised Exclusive India  
Distributor - Bulk Query Welcome*

GURGAON, HARYANA, INDIA, May 4, 2016 /EINPresswire.com/ -- Their range of GRAFEX Cues is the only product of it's kind in the world of billiards today. The patents are based on study of torsion research which has yielded results with more power and spin as compared to traditional wood cue sticks. It plays better than cheaper moulded graphite cues as well where the process is to just melt a composite and give it shape. These Sticks have a proprietary foam as the base and layers upon layers of Graphite and Fiberglass making them light and strong. The life of these cues is 5-10 times more than that of wooden cues that need replacing every 1-2 years due to warping.

There is absolutely no wood used in the manufacture of these models. These cues can even be left in the car during extreme Indian summers without warping which is very much the case with wooden cues. Being perfectly straight right from the start, these cues induce a better stroke and hence a better game. It is only a matter of time before this product revolutionises the industry like graphite tennis rackets did. All of the models of the mentioned cue stick range have a multi weight system making it an even better value for money. This range comes prepacked with a hanging display packaging and just takes up one nail beam on the wall to save space. This company is the only renowned international sporting goods manufacturer to be making a cue stick of this quality worldwide. Ps. This will last the Indian climate: (wood bends out of shape in heat and humidity)

We supply worldwide free of  
cost
