However, based on the calls the Mesothelioma Victims Center receives a diagnosed victim of mesothelioma could live in any state including New Mexico.

High risk work groups for exposure to asbestos in New Mexico include US Navy Veterans, power plant workers, oil refinery workers, civilian employees of the Defense Department, manufacturing, or industrial workers, plumbers, electricians, auto mechanics, machinists, miners, or construction workers. Typically the exposure to asbestos occurred in the 1950's, 1960's, 1970's, or 1980's.
