ITpreneurs Releases Mike Orzen's Signature Course on Value Stream Mapping for Lean IT

ROTTERDAM, THE NETHERLANDS, May 17, 2016 /EINPresswire.com/ -- ITpreneurs, the leading provider of IT training content and services, is proud to announce the release of the course on Value Stream Mapping (VSM). This course is authored by award-winning Lean IT expert, Mike Orzen. Training and consulting providers looking to help organizations apply value stream mapping to drive transformational Lean IT improvements can add this course to their offering by licensing the training materials today.

"Value Stream Mapping is one of the most popular tools in the Lean toolkit, but it's benefits are seldom realized by companies due to a lack of understanding of the why as much as the how of the mapping process." Mike Orzen.

Value Stream Mapping for Lean IT
The Value Stream Mapping for Lean IT course helps participants apply the VSM practices in technology, service, and office work environments. This course is beneficial to IT leaders responsible for creating sustainable and measurable performance improvement; Lean IT practitioners; Lean IT champions, coaches and facilitators; and IT professionals who are participating in or involved with lean projects. View Course Fact Sheet.

About Mike Orzen
Mike Orzen is the award-winning best-selling co-author of "Lean IT: Enabling and Sustaining Your Lean Enterprise", the book that so many consider "The Bible" of applying Lean to information and technology. Mike delivers a unique blend of Lean, Six Sigma, IT and Operations. He has been consulting and coaching for over 20 years. Mike's experience includes systems design, enterprise-wide project management and large-scale rollout of Lean initiatives in global companies as guide and coach.

ITpreneurs Lean IT Portfolio
In addition to the Value Stream Mapping for Lean IT course, ITpreneurs courseware library features the full portfolio of the Lean IT Association (LITA) Portfolio from Lean IT Foundation to Lean IT Kaizen. Lean IT Leadership will be released later in the year. We also feature a business simulation Ease-IT that supports Lean Thinking and BPM implementations. This simulation is available in Dutch, English, French, Portuguese, Spanish. Browse our courseware library and start using our ready-to-use content to deliver IT training to your clients.

Benefit from High Quality, Low Barrier, Easy-to-Access Training Content

Working with IT training providers is ITpreneurs core business. With thousands of titles available "off-the-shelf" in key IT domains, and a full range of support services, you can quickly, easily broaden your portfolio and create new revenue without investing in in-house content development and maintenance. Need more information about licensing our courseware? Contact us on info@itpreneurs.com.
