PUNE, INDIA, May 16, 2016 /EINPresswire.com/ -- The research analysts forecast the [folding carton market in North America](#) to grow at a CAGR of 2.09% during the period 2016-2020. Folding cartons are paperboards that are cut, folded, laminated, and printed for packaging goods. They are available in various sizes and shapes and are often delivered as flat paperboards marked with folding lines to help in packaging. The cartons are made of virgin wood pulp, recycled paper stock, or other fibers. Many new technologies offer aesthetic appeal to these folding cartons. They are used for a number of product packaging purposes, but most of the revenue in the market comes from the food and beverage segment.
