PUNE, INDIA, May 16, 2016 /EINPresswire.com/

-- The research analysts forecast the [flexible packaging market in Europe](#) to grow at a CAGR of 5.84% during the period 2016-2020. Flexible packaging products are made of easy-yielding materials that can easily change shape to accommodate the product being packaged. Plastic, paper, aluminum, and other materials such as cellulose are used to make flexible packaging. These materials undergo printing, lamination, coating, and extrusion to develop products such as plastic bags and pouches, lidding films, foil bags, and sachets. Flexible packaging protects the product from damage and spoilage, and improves its overall aesthetic appeal. It also provides essential information about the product and convenience for consumers in terms of handling.
