# Mark Systems Announces Rowan University Scholarship

*Software developer extends long standing partnership with local college.*

MOUNT HOLLY, NEW JERSEY, UNITED STATES, May 18, 2016 /EINPresswire.com/ -- Mark Systems announced today it is extending its long standing partnership with Rowan University, sponsoring a scholarship for the 2016-2017 academic year.

The $2,000 scholarship is available to a student who is the child of a Mark Systems' employee or any sophomore, junior, or senior student seeking a degree in Computer Science at the College of Science and Mathematics.

> We are very pleased to have the opportunity to reach outside of Mark Systems to make college a little more affordable, and help a student achieve their educational goals
>
> *Scott Duman, President & CEO, Mark Systems*

The partnership between Rowan University and Mark Systems has grown through the years as several employees are alumni, some currently enrolled in Master's programs at Rowan. Mark Systems works closely with Rowan's Computer Science Department when filling engineering positions, even collaborating on a senior project with students in 2015.

"We are very pleased to have the opportunity to reach outside of Mark Systems to make college a little more affordable, and help a student achieve their educational goals," said Scott Duman, President & CEO of Mark Systems, and a Rowan University alumni.

About Mark Systems

Mark Systems' IHMS is the industry's only single database home builder software suite.

No other home builder software offers the power, flexibility, ease of use, and return on investment of IHMS. The premier residential construction accounting software on the market today, IHMS combines a proven track record of performance with cutting edge technology to provide the performance control today's tough business climate demands.

Through the use of interactive maps, LotVue's apps, LotInsight and LotBuzz, allow developers and builders to easily visualize lot inventory, construction progress, sales status, budget and schedule variances, architectural and other vital information.

Mark Systems' single database architecture means that residential construction information is

delivered instantly and transparently to every team member. Purchasing, scheduling, field operations, trade partners, sales office, and design center personnel all effortlessly share critical information.
