

Progeneration Energy and NSL Aerospace Team Up to Reduce Inputs and Maximize Outputs.

Targeted towards manufacturing businesses located in rural areas, to assist in grant applications and assistance with the REAP energy grant and other programs.

THE WOODLANDS, TEXAS, UNITED STATES, May 18, 2016 /EINPresswire.com/ -- [Progeneration Energy](#) has announced an innovative plan to maximize savings in energy and operating costs for rural manufacturing companies.

Progeneration prides themselves in having a 100% record of acceptance for funding!

Anthony Shaw

[NSL Aerospace](#) sought out a solar energy system installation with a payback period of less than the 9 year local average. The facility's energy use would normally warrant a 145kW solar system; however, the facility roof capacity, and local code regulations limited Progeneration to a 123kW system;

however, Progeneration was able to find a solution.

Using cutting edge solar energy technology, Progeneration's design team created a 123kW system with an efficiency of 86%, which is far above the industry average of 80%, therefore providing the same production as a 145kW system. This success in technology has allowed them to offer a variety of services to their partners and clients.

Progeneration Energy is an expert at working with the USDA, and their Rural Energy for America Program, to provide qualified customers with a solution to financing needs at little to no cost. Along with reducing the size and cost of the NSL Aerospace project, Progeneration was able to work with federal and local programs to generate grants of over \$97,000. This created system savings of over \$185,000 when combined with the Investment Tax Credit! The result was a 5.5 year payback, and a very happy Progeneration Energy Partner.

Progeneration prides themselves in having a 100% record of acceptance for funding, and they are experts in the government grant, and financing application processes. If your facility is in need of energy solutions, Progeneration makes it so you don't have to stretch your budget in order to make it happen. Whether you are a school, rural business, or small business, Progeneration has the financing tools for you.

About Progeneration Energy: Progeneration Energy is the largest privately owned provider of energy management services in the southeast United States. Headquartered in Houston Texas, Progeneration currently serves clients in Texas, Florida, Tennessee, Mississippi, Georgia, and the Cayman Islands. By providing energy efficient solutions through consulting, design, financing, and energy conservation programs, Progeneration has helped their clients achieve over \$61 million in combined utility savings and revenue generation and over \$280 million in process improvement savings.
