Cloud Based Software Queensland Increases in Popularity in 2016

Smile IT advises that cloud based software Queensland increases in popularity in 2016 with the private and commercial sectors.

CALOUNDRA, QUEENSLAND, AUSTRALIA, May 19, 2016 /EINPresswire.com/ -- Smile IT is a well-established IT support company based in Brisbane, Australia. This leading support specialist offers years of industry knowledge and experience, providing customers with top quality products and services since 2007.

The company has built up quite a reputation throughout Australia for their tailored support and custom services. The company helps more than one thousand customers with a host of IT services from computer repairs to cloud solutions to support, consulting and so much more.

Smile IT helps customers with cutting edge technology, catering to all types of systems from Microsoft to Google to Apple and more. They provide superior services using their experienced team to surpass clients expectations now and moving forward.

This company comprises of an experienced and dedicated team of professionals who focus on providing their customers with first class service and support at all times. The team offer over seventy five years combined industry experience, providing customers with all the assistance and support they need each and every day.

Ralph Steven-Jennings, the director at Smile IT said recently "We have seen a considerable increase in demand for cloud based software in Queensland. Companies are seeing the financial benefits of cloud based solutions, especially where they have team members working from home in order to reduce costs. Cloud based software helps to improve productivity while saving on money, ideal for any modern company who want to work outside the box to achieve results."

Smile IT has grown so much over the years to become a top choice for assisting customers with cloud based software. The team advised that they believe their success is due to their experience, their host of services, their affordable prices and their dedication to customer service and support.

The company has added new members to their experienced team to help them manage the demand for their services this year. Each team member receives regular training and stays up to date with latest trends and upgrades, ensuring that they can cater to all their clients at all times. The company advised that their team is carefully selected to ensure that they can work together to provide results.

Smile IT also mentioned that due to the demand for cloud based services this year, they have increased their targets. Last year the company enjoyed great success and they are working hard this year to smash last years records.
